Project Update WIS 167 - Mequon Rd. Country Aire Drive Intersection September 17, 2018

The Wisconsin Department of Transportation (WisDOT) Southeast Region continues progress on the reconstruction of WIS 167 and the Country Aire Drive Intersection.

July/August Progress

Department contractors closed WIS 167 on July 9th. Contractors have completed all removals, roadway grading, and - with exception for work adjacent to the Canadian National Railroad crossing, - installation of all storm sewers. Curb and gutter construction began the week of September 10th and electrical contractors have begun installation of underground conduits for new traffic signals.

Canadian National Railroad completed removal of their existing railroad crossing/panels, track leveling, and moving of existing railroad signals that will be used until new signal and gates are installed in late fall/early winter.

Scheduled Work—

Canadian National Railroad will complete their railroad crossing work the week of September 17th.

Department contractor will continue construction of curb and gutter and locations of sidewalk through September. Electrical contractors will follow that work with foundations for new traffic signal poles and installation of overhead signal equipment. The construction of the remainder of storm sewer, driveway culverts, detention pond grading, and slope restoration will begin the week of Sept 17th, followed by landscaping/restoration.

Asphalt paving is scheduled to tentatively begin late the week of September 24th and will extend into early October—followed by final pavement marking and signing.

Traffic Impacts/Stage Changes

- **Access across the Canadian National Rail Crossing will remain closed to all public use until construction is complete.**
- WIS 167 and Country Aire Drive will continue to be closed and detoured until paving and required signing, and pavement marking is complete.

The department is projecting opening WIS 167 and Country Aire Drive in late October.
